Willow Creek Paving Stones are available in two distinctive textures to complement the full range of applications, from a backyard makeover to historic renovation and contemporary design. Our traditional finish features clean lines and a crisp beveled edge, while Willow Creek Weathered has the vintage, hand-hewn look of colonial Americana.

WILLOW CREEK PERMEABLE PAVERS

Willow Creek permeable pavers are the green landscaping solution you've been looking for. A concrete paver system with an environmental twist, Willow Creek permeable pavers will reduce stormwater runoff and beautify your property at the same time. The system allows stormwater to drain through aggregate-filled voids between the pavers into subsurface soils, from where it can filter down to recharge local groundwater.
