

8cm BRICKSTONE

Willow Creek's 8cm Brickstone™ classic pavers can recall the colonial Americana look of brick-paved streets or complement the most contemporary architecture. With their simple rectangular shape, 8cm Brickstone pavers can be arranged in a variety of appealing patterns. These large 8cm pavers are engineered to meet performance standards and aesthetic demands of landscape professionals yet are easy to install for homeowners too.

Use Brickstone pavers to create parking lots, roadways, bus stops and other projects requiring a beautiful, durable surface suitable for vehicular use. Brickstone can also be used in contrasting colors to delineate spaces and define directional marking for parking, streets and more. Use Brickstone colors to create interesting patterns, such as herringbone, or to incorporate a wide, contrasting accent of color or texture with other Willow Creek pavers.

NOTE: To avoid scuffing the surface of the pavers, it is recommended that compactors be fitted with protective pads. Colors shown might not match product colors exactly. Photographic and printing processes are not capable of reproducing all product colors. Due to manufacturing processes, color might also vary between production runs. Please visit your landscaping products supplier to view actual product samples.
